REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a communication circuit and method for communication relating to a Bluetooth Wireless Communication System. A search of prior art records has failed to disclose a communication system comprising;

“a timing circuit coupled to receive an initial value corresponding to a predetermined time, the timing circuit arranged to produce a first control signal in response to receiving the identification signal within the predetermined time and arranged to produce a second control signal in response to not receiving the identification signal within the predetermined time” along with the remaining limitations of claim 1.

“a measurement circuit coupled to receive the first data signal from the plurality of antennas, the first data signal including an identification signal that identifies one of the communication circuit and the remote transmitter, the measurement circuit arranged to measure the first data signal from each antenna and produce a respective weighting coefficient corresponding to said each antenna; a timing circuit coupled to receive an initial value corresponding to a predetermined time, the timing circuit arranged to produce a first control signal in response to receiving the identification signal within the predetermined time and arranged to produce a second control signal in response to not receiving the identification signal within the predetermined time” along with the remaining limitations of claim 14.

Nor does the prior art teach a method of communicating with a remote communications circuit comprising the steps of: “transmitting a first plurality of data signals to the remote communication circuit on a first sequence of respective frequencies wherein the first plurality of

data signals includes an identification signal that identifies at least one communication circuit; receiving a second plurality of data signals from the remote communication circuit on the first sequence of respective frequencies; producing a first control in response to receiving the identification signal within a predetermined time; and producing a second control signal in response to not receiving the identification signal within the predetermined time” as disclosed in claim 35.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

DRAWINGS

2. The drawings were received on 13 April 2004. These drawings are accepted by the examiner.
